Zusammenbau der Dachrinne assembling of drain pipes

Deutsch

Mit dem Dachrinnenbausatz können Sie Dachrinnen und Fallrohre individuell auf Ihr Gebäude anpassen.

Beginnen Sie immer mit dem Anbringen der Dachrinnen **(1)** am Dach. Kürzen Sie diese mit einem scharfen Messer.

Achten Sie darauf, mindestens einen Regenablauf an einer Seite beizubehalten.

Sollten Sie zwei Regenabläufe rechts und links benötigen, schneiden Sie die überschüssige Länge der Dachrinne aus der Mitte heraus und setzen beide Enden anschließend wieder zusammen.

Danach kleben Sie an den Enden der Dachrinnen die Abschluß-Stopfen **(2)** an.

Wählen Sie anschließend aus den verschiedenen Winkelstücken **(3)** das am besten passende aus und stecken es von unten in den Ablauf der Dachrinne.

Nun längen Sie die Fallrohre **(4)** entsprechend der Höhe des Gebäudes ab.

Um die Fallrohre für hohe Gebäude zu verlängern stecken Sie diese einfach ineinander.

Die Schellen **(5)** können entweder mit einer kleinen Bohrung (1,9mm) in der Wand des Gebäudes befestigt werden, oder Sie schneiden die Haltezapfen ab und kleben die Schellen flach auf die Wand.

Fädeln Sie die Fallrohre durch die Schellen und stecken Sie das Fallrohr von unten in das Winkelstück.

English

To create individual drain pipes for your model building use the rain drain kit.

Start with the fixation of the roof rails **(1)**. Shorten them with a sharp cutter. Leave at least one drain outlet at each roof rail.

If you need two outlets (right and left), cut away the middle part of the roof rail and connect both ends afterwards.

Glue the end pieces **(2)** to the roof rail.

Choose from the different angle pieces **(3)** the one, fitting best. Put it into the drain outlet from the bottom.

Shorten the water downpipes **(4)** according to the height of your model building.

If you need to extend the downpipe for taller buildings, connect two downpipes easily by putting them together.

You can fix the handcuffs **(5)** either by putting them into a drilled hole (1,9mm / 0,07in.) in the wall of the model building or by glueing them directly onto the wall after cutting off the sockets.

Now you can mount the downpipes.
